

### **Over 50,000 Customers Use the Mobile Broadband Add-On Option for Fixed Net Broadband**

Statistical data shows that 80% of mobile broadband usage takes place at home. Hence, as soon as the customers are in the coverage area of their WLAN with their laptop, a high-speed Internet connection is automatically and seamlessly activated upon confirmation. On the go the customers enjoy the freedom of mobile Internet.

With this unique product bundle in Austria offered by Telekom Austria combining Internet surfing at home and on the go, customers can reap the benefits of both fixed and mobile technologies
